Press Release

Aspen Owners Get Special Aircraft Parking Area at Sun ‘n Fun 2010

Albuquerque, NM, March 20, 2010: As part of Aspen Avionics’ sponsorship of General Aviation Parking during this year’s Sun ‘n Fun, arriving aircraft with Aspen panels will be directed to a unique parking area adjacent to the new Aspen Tram Stop. The Aspen Avionics customer parking area is also conveniently located next to Aspen’s hospitality tent. This is the third year that Aspen has sponsored the General Aviation Parking area.

“It’s routine for aircraft models to be grouped together when parking at a major air show, but this is the first time we know of where aircraft will be grouped together according to their panels,” said Aspen Avionics Vice President of Marketing Brad Hayden. “The aircraft in this special parking area will speak to the incredible versatility of the Evolution Flight Display in a wide variety of makes, models and production years.”

Aspen Avionics will provide to any customers attending Sun ‘n Fun a PDF file to print out that will serve as a windshield sign. Upon landing, the Aspen owner will display this sign so that Sun ‘n Fun’s volunteer aircraft marshalls can direct them to the Aspen Avionics parking area.

“A side benefit of this area is for show attendees to see actual installations in diverse aircraft,” added Hayden. “We know our owners will be pleased to show off their new glass panels.”
The Aspen Avionics parking area is located in the western section of the General Aviation Parking area along Taxiway E. In addition to the Aspen customer parking area, arriving pilots will be welcomed at the Aspen Avionics hospitality center.

The windshield sign and further details can be found at www.aspen'avionics.com/index.php/sun-n-fun/2010/

**About the Evolution Flight Display System**

The Aspen Evolution Flight Display System is an affordable, expandable and upgradeable PFD, MFD and hazard sensor cockpit solution for general aviation aircraft. Highly compatible with existing aircraft avionics, the flexible Evolution Flight Display System lets aircraft owners install all Evolution Flight Displays and options at once, or separately, as their needs and budgets permit.

**About Aspen Avionics, Inc.**

Aspen Avionics specializes in bringing the most advanced technology and capability from the commercial and business aviation markets into general aviation cockpits—and budgets. Our products increase situational awareness and reduce pilot workload, making it easier and safer to fly in both VFR and IFR conditions. The way we look at it, getting the latest avionics technology shouldn’t always mean spending a lot of money—on equipment or installation. At Aspen Avionics, we design products to be affordable, easy to install, and easy to own. Our web address is www.aspen'avionics.com or we can be reached at (505) 856-5034.
